

EQUIPMENT
CATALOG

Manufacturing tough, innovative equipment that moves you forward.

QUALITY

When it comes to quality, we never compromise. From production to service, we deliver equipment that's built to last. That's what Ledwell Made means.

GRIT

We work hard. We're problem solvers. We meet customer challenges with innovative solutions. We get it done.

LEGACY

It took sweat, dedication, and a lot of hard work to build this company. This legacy guides us today.

FAMILY

Our people care. We do what's right for our employees, our customers, and our community – because that's what family does.

ROLLBACK

Hauling solutions to boost durability and value.

Our Rollback Trucks are unmatched in ruggedness and reliability, so you can depend on them day in and day out.

A double-acting pair of hydraulic cylinders control the Hybrid Rollback bed's movement. They can be customized in length to meet your exact needs, ranging from 21 to 30 feet.

MACHINERY MOVING ROLLBACK

Best in strength for Rollback equipment.

The Machinery Moving Rollback from Ledwell is a powerful solution when you require the ultimate strength from your rollback equipment. Easy to use and designed with you in mind, it performs identically to our Medium and Heavy Duty Rollbacks. You can choose a bed length of 28 or 30 feet.

The Machinery Mover is unmatched in its durability and functionality. We manufacture this truck to carry heavy loads and withstand long-term use.

HYDRATILT TRUCK

Leading the way in hauling equipment.

Our patented HydraTilt Truck, available in lengths of 28 or 30 feet, is unmatched in its ability to haul containers and non-powered equipment.

The HydraTilt Truck operates similarly to our HydraTail Truck but with the bonus of a tilting main deck. Additionally, the HydraTilt has a low ride height to haul larger equipment and provide easy access to tie-down equipment.

HYDRATAIL TRUCK

A truck built for more payload.

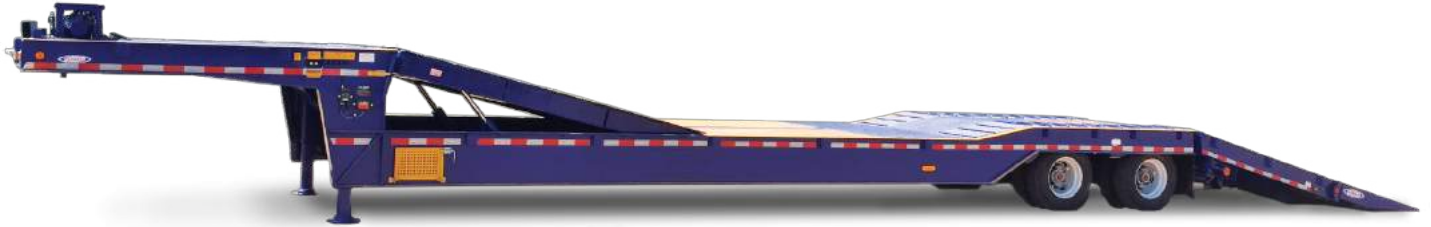

An excellent vehicle to quickly and efficiently haul your equipment. Beds are generally 26 feet, 28 feet, or 30 feet long and sit directly on the chassis frame. Resulting in the main deck sitting about five inches lower than the Ledwell Rollback. This provides more height allowance for larger loads, all while designed with the same first-class tail as our HydraTail Trailers.

details

HYDRATAIL TRAILER

Designed to haul any heavy load.

The Ledwell Perimeter Beam HydraTail Trailer is the go-to option for equipment haulers. This versatile trailer is available in lengths of 48 or 53 feet with multiple options for transporting equipment. Its hydraulically powered full-width mini-deck allows easy access to the upper deck for additional cargo space.

A drop in the deck provides up to 10 more inches of load height. The optional knuckle boom trough fits excavator booms perfectly, lowering the load's overall height.

MAXTILT TRAILER

Meet our highest-tilting trailer ever

The MaxTilt Trailer is designed with a main deck that rises up to 32 degrees—creating little to no breakover, making it an excellent solution for transporting containers, trucks, and other large items.

The MaxiTilt comes in a length of 48 or 53 feet. Thanks to its unified hinge, this trailer can easily load and unload low clearance equipment.

details

HYDRATILT TRAILER

Optimal for hauling low clearance and non-powered equipment.

HydraTilt HydraTail Trailers are versatile equipment capable of hauling just about anything. They are available in lengths of 48 and 53 feet.

This trailer is the perfect solution when you need to get low. It's the ideal trailer for non-powered equipment to easily load and unload. Utilizing a hydraulic main deck hinged at the rear, the HydraTilt Trailer allows you to achieve a minimal breakover angle between the tail and the main deck.

DETACH GOOSENECK TRAILER

The best for oversized heavy payloads.

Ledwell's Detachable Gooseneck Trailer is the best of both worlds in heavy haul and equipment transporting. When you have a job that requires a heavy load with a minimal vertical climb, detach the nose and load on the lower deck from the front.

The 53-foot length is our most popular choice for this trailer.

TRACTOR RIG UP

Ledwell offers custom tractor up fits to go on any new or used tractor. Choose from various Tractor Wet Kits that provide outstanding performance in the Oil and Chemical, Bulk Haul, and Transportation Industries. High quality pumps and hydraulic systems deliver a product that you can rely on.

GULL WING

Built for deliveries that require extra protection.

Ledwell designed the patented Gull Wing™ Truck for loads that require extra protection. Its specialty wing design allows the truck to carry multiple pallets of material on each side, making it uniquely equipped to haul loads safely.

The Ledwell Gull Wing™ is 25.5 feet long with a 24 foot cargo area and up to a 14.7 foot clearance.

Our Gull Wing Truck shields and protects pallets and other cargo, rain or shine, so your materials arrive undamaged.

Unload material efficiently with a forklift from either side of the body.

SERVICE TRUCK

Work-ready solution for mobile maintenance

When equipment goes down in the field, you need a service truck with everything required to perform off-site repairs. We've partnered with Stellar Industries to deliver the best service trucks.

Options include the TMAX1-11, TMAX2-11, and TMAX2-14. Each model comes prepped with a heavy-duty crane. Add a Lube Buddy for the complete mobile service truck for your fleet.

LUBE BUDDY

Perform lube service and maintenance directly in the field.

Two options provide a mobile service center designed for your light-duty pickup truck or medium-duty flatbed. The Lube Buddy, Jr, or Lube Buddy Max are easily transferable from the truck to the job site, making the Lube Buddy work where you need it.

Available with two 20-gallon fresh tanks and one 40-gallon waste tank or 100 and 50 gallon fresh tanks and 150-gallon waste tank, respectively. The Lube Buddy is a must-have for any operation to service equipment when and where you need to.

LUBE BUDDY MAX

LUBE BUDDY JR.

SELF-CONTAINED UNIT

Operate any Ledwell Trailer with any tractor.

This engine driven pump offers enough power to fully operate any Hydratail Trailer to keep business moving, even if your tractor isn't. Portable and compact, this unit fits on the top deck of any trailer.
